

The origin of the Modern Human

Y-Adam's place and meaning for the human (The Evolutionistic Creationism)

The direction of the human expansion →

Our common ancestor, Y-Adam, was "formed" by the Creator during about 7 million years - as the human, as human being separate from the animal ancestor. **Is the Evolutionistic Creationism of AMH.**

Y-Adam, the common father of all modern humans, lived about 250,000 years BP, in the S-W Cameroon, because they live there the families, which above Y-Adam earliest arose, namely the haplogroups: A00, A0, A1a, A1b1 and B.
